

## Errata Test Package 15.1

11/11/2018

- Fix typo in View and Modify Alarms.

<b>Alarm and Event Management - Life Safety <u>Advanced</u> View Notifications - A</b>	
R <sup>1</sup>	Base Requirements
<sup>1</sup> Contact BTL for interim tests for this BIBB.	

- Remove extra entry for Encrypted Device - "**Network Security BIBBs**", there are two identical BIBBs named "Network Security - Encrypted Device".
- Fix Test Plan references that are not 135.1-2013 or BTL. Two instances found: 6.6.6 and 8.14.6.
- In BTL Specified Tests, Modify 7.3.1.X8.2 Reliability\_Evaluation\_Inhibit Summarization Test in step to to refer to Reliability\_Evaluation\_Inhibit instead of Event\_Algorithm\_Inhibit.
- In BTL Specified Tests, Change name of test: 9.1.1.X3 to remove the 'Revision 5 or higher only' text.
- In BTL Test Plan, change all references to test 9.1.1.X3 to reference the new name that was changed in the previous item.
- Reason for Change in BTL Specified Tests for 7.3.2.10.1 should say 'shall not be in the Active\_COV\_Subscriptions...' vs the 'shall be ...'. See 15.1.e-7.
- In BTL Test Plan, Tests numbered 8.28.3 and 8.29.3 are misnamed as "an CharacterString" instead of the "a CharacterString".
- In BTL Test Plan, Renumber test 10.1 - Processing Application Layer Messages Originating from Remote Networks to 10.1.1. Change reference from 135.1 to BTL.
- In BTL Specified Tests, renumber test 10.1 to 10.1.1 and merge with copy in 135.1-2013 if necessary.
- Add remaining sections to BTL Test Plan to match new sections in Checklist document. All new sections are labeled 'Contact BTL for interim tests for this ...'.
- Removed Duplicate reference to test in section 3.36.17 Supports COVU\_Period and COVU\_Recipients properties. The test 'Global Group COVU Initiation Tests' does not exist and the test number referenced was already referenced with a different title.
