INTERIM TEST SPECIFICATION

To Be Used with Test Package 23.0
Version 1
December 22, 2022

Published on December 22, 2022

Foreward

The purpose of this document is to define interim tests and other test package changes made to support testing of a device that supports functionality currently not covered in the released BTL Test Package. This document shall be applied and used with BTL Test Package 23.0.

Vendors who are planning to submit a device for testing and who implement Protocol_Revision 24 and higher, or which contain functionality not covered by the Official Test Package, should use this Interim Test document.

Please note that if the device contains functionality not yet covered by the official Test Package, nor by the Interim Tests document, development of new tests may be required for your device. Please contact the BTL Manager before submitting your device for testing to ensure you are aware of all tests that will need to be applied to your device.

The changes in this document are for interim use only and may or may not be used as documented here when the final changes are applied to the next Test Package revision. Devices tested using this interim test document shall be recalled for updated testing when the next revision of test package is released that includes the topics covered here.

In the following document, language to be added to existing clauses of ANSI/ASHRAE 135.1-2019 or any part of the Test Package 23.0 are indicated through the use of *italics*, while deletions are indicated by ~~striketrough~~. Where entirely new sections are proposed to be added, plain type is used throughout.
