

Clarification Request

References: 135.1 - 2007 - 9.30.1.1 UTCTimeSynchronization Service Execution Tests Local Broadcast, and BTL Specified Tests - 9.30.1.1 UTCTimeSynchronization Service Execution Tests Local Broadcast, Addendum 135-2008ac

Background:

135.1-2007 - 9.30.1.1 - Local Broadcast, and corrected test BTL - 9.30.1.1 - Local Broadcast, which omits steps 5 through 8 and renumbers subsequent steps, both contain provision: "If the time indicates that the day of week is unspecified but all other fields are correct the result shall be considered to be a pass."

Question:

Should the BTL-WG sanctioned Test remove that provision, in light of Addendum 135-2008ac?

Response:

No. Await SSPC action in this regard.
