

Clarification Request

References: BTL Checklist / BTL Test Plan

Date of BTL-WG Response: May 23, 2013

Background:

There are a number of deprecated BIBBs in the BTL Checklist. For example:

Alarm and Event - Alarm Summary - A		
	R	Base Requirements

Most, if not all, have newer versions that encompass the functionality of the deprecated BIBBs. For example:

Alarm and Event - Alarm Summary View - A		
X	R	Base Requirements
X	R	Supports initiation of GetEventInformation service

Question:

Should an IUT claim the deprecated BIBBs if the functionality is supported by the IUT.

Response:

All the associated deprecated BIBBs in the checklist shall be claimed if the new BIBB is supported.
