

Clarification Request

References: BTL Test Plan 12.0.final, tests 7.2.X1, 7.2.X5

Date of BTL-WG Response: April 18, 2017

Background:

In BTL Test Plan

3.17.4 Contains a Writable Recipient_List.From_Time Property

The IUT contains, or can be made to contain, a Notification Class object that contains a writable Recipient_List.From_Time property.

BTL - 7.2.X5 - Time Non-Pattern Properties Test		
	Test Method	Manual
	Configuration	As per <i>BTL Specified Tests</i>
	Test Conditionality	Must be executed.
	Test Directives	Apply to the Recipient_List.From_Time property.
	Testing Hints	
	Notes & Results	

Test Conditionality states: Must be executed.

Same for 3.17.5 Contains a Writable Recipient_List.To_Time Property

The IUT contains, or can be made to contain, a Notification Class object that contains a writable Recipient_List.To_Time property.

BTL - 7.2.X5 - Time Non-Pattern Properties Test		
	Test Method	Manual
	Configuration	As per <i>BTL Specified Tests</i>
	Test Conditionality	Must be executed.
	Test Directives	Apply to the Recipient_List.To_Time property.
	Testing Hints	
	Notes & Results	

Same for 3.19.1 Base Requirements (of Schedule Object)

Base requirements must be met by any IUT that can contain Schedule objects.

BTL - 7.2.X1 - Date Pattern Properties Test		
	Test Method	
	Configuration	As per <i>BTL Specified Tests</i> .
	Test Conditionality	Must be executed.
	Test Directives	Apply to the Exception Schedule property.
	Testing Hints	
	Notes & Results	

Question:

Should Test Conditionality: in above mentioned sections instead be: "Must be executed if IUT is Protocol_Revision 11 or higher"?

Response: The test conditionality will be changed in sections 3.17.4 and 3.17.5 In contrast in section 3.19.1 test 7.2.X1 is written and meant to be applied to all products at all Protocol_Revisions.
