

### Clarification Request

**References:** BTL TP 23.0 9.8.7

**Date of BTL-WG Response:** 2023-March-02

**Background:**

Test Package 23.0 added required support for NM-BBMDC-B if the device supports and IPv6 and can operate as a BBMD.

Data Link Layer - IPv6		
	R	Base Requirements
	C <sup>1</sup>	Is able to operate in Normal mode
	C <sup>1</sup>	Is able to operate in Foreign mode
	C <sup>2</sup>	Is able to operate in BBMD mode
	R	Supports configuration through Network Port object
	O	Supports DHCP
	<b>BTL-C<sup>3</sup></b>	<b>Supports NM-BBMDC-B</b>
<sup>1</sup> Required if the device does not support BBMD mode. <sup>2</sup> Required if the device does not support Foreign mode. <sup>3</sup> Required if the device is able to operate in BBMD mode.		

**Problem:**

The NM-BBMDC-B BIBB in 135-2020 is for Annex J IPv4 data link.

**Question:**

Should “Supports “NM-BBMDC-B” be removed from Data Link Layer – IPv6 in the Checklist?

**Response:**

**Yes.**
