

## **Clarification Request**

**References:** 135-2008n, Protocol\_Revision 10

### **Background:**

Addendum 135-2008n provided a revised Backup & Restore procedure, in Protocol\_Revision 10. Is it allowable, required, or prohibited for an earlier IUT, with Protocol\_Revision less than 10, to contain properties and behaviors that conform to the new corrected procedure described in Addendum 135-2008n?

### **Response:**

Backup\_Preparation\_Time, Restore\_Preparation\_Time, Backup\_And\_Restore\_State, and Restore\_Completion\_Time properties are forbidden to appear in a device lower than Protocol\_Revision 10. In a device with Protocol\_Revision lower than 10, proprietary properties that serve the same purpose are permitted.
