

Clarification Request

References: BTL Test Plan-5.0.final

Background

There is an error in the Test Plan 5.0.final

In both Test Plan sections 2.1.5 and 2.1.6, tests 10.5.1.1 and 10.5.1.2 need Testing Hints, because the Testing Hints is what distinguishes 10.5.1.1 and 10.5.1.2.

10.X.3 does not need any. But 10.X.3 has them, in both Test Plan section 2.1.5 and in section 2.1.6. 10.5.1.1 and 10.5.1.2 do not have them in either section.

In Test Plan section 2.1.5, the existence of a misguided Testing Hints, to verify that there is no network number, changes the interpretation of the test result.

Question:

Is this an errata, which should be corrected by moving the Testing Hints out of 10.X.3 and into 10.5.1.1 and 10.5.1.2 respectively, in sections 2.1.5 and 2.1.6?

Response:

Yes, the TD in second sentence of Test Concept should be IUT. We will remove the Testing Hints in the Test Plan for test 10.X.3
