Clarification Request

References: BTL Test Plan 23.3, 135-2020

Date of BTL-WG Response: February 22, 2024

Background:
The description in each of the below Test Plan sections requires support for the creation and deletion of an additional set of objects.

Notes:
For comparison purposes, Section 5.19.3 is included.
Items in RED are known issues.

AE-AVM-A

5.19.3 Supports DM-OCD-A

The IUT shall support DS-OCD-A in order to allow the user to create Event Enrollment and Notification Class objects.

Verify Checklist		
	Test Conditionality	Must be executed.
	Test Directives	Verify that the IUT claims support for DM-OCD-A and that it claims the ability to create and delete Event Enrollment, Notification Class, and Notification Forwarder objects.
	Testing Hints	

AE-LSAVM-A

5.30.4 Supports DM-OCD-A

The IUT shall support DM-OCD-A in order to facilitate creation and deletion of life safety objects.

Verify Checklist		
	Test Conditionality	Must be executed.
	Test Directives	Verify that the IUT claims support for DM-OCD-A and that all object types required by DS-LSAVM-A are claimed within DM-OCD-A.
	Testing Hints	

AE-ACAVM-A

5.35.5 Supports DM-OCD-A

The IUT shall support DM-OCD-A in order to facilitate creation and deletion of life safety objects.

Verify Checklist		
	Test Conditionality	Must be executed.
	Test Directives	Verify that the IUT claims support for DM-OCD-A and that all object types required by DS-ACAVM-A are claimed within DM-OCD-A.
	Testing Hints	

AE-EAVM-A

5.39.4 Supports DM-OCD-A

The IUT shall support DM-OCD-A in order to facilitate creation and deletion of elevator [].

Verify Checklist		
	Test Conditionality	Must be executed.
	Test Directives	Verify that the IUT claims support for AE-OCD-A.
	Testing Hints	

In 135-2020, each of the above BIBBs contain the same sentence: "Device A shall be capable of creating/deleting Event Enrollment, Notification Class, and Notification Forwarder objects in the B device."

Problem:
135-2020 BIBBs AE-LSAVM-A, AE-ACAVM-A, and AE-EAVM-A require the creation and deletion of Event Enrollment, Notification Class, and Notification Forwarder objects while the Test Plan for those BIBBs requires creating and deleting additional objects.

Question:
Should the Test Plan for BIBBs AE-LSAVM-A, AE-ACAVM-A, and AE-EAVM-A be changed to not require the creation and deletion of objects beyond Event Enrollment, Notification Class, and Notification Forwarder?

Proposed Response:

Yes.
