

Clarification Request

References: 135-2008 section 21

Background / Proposed Solution:

Protocol_Conformance_Class property has the comment -- This property was deleted in version 1 revision 2.

Question:

Is the presence of the Protocol_Conformance_Class property, in a device with a Protocol_Revision greater than 2, a defect?

Response:

Yes, it is a defect, and also in Protocol_Revision equal to 2. The presence of any standard property identifier in a device with Protocol_Revision equal to or higher than the Protocol_Revision in which it was declared deleted, is a defect.
