

Clarification Request

References: BTL Test Plan section 3.19.5 and 135.1 - 2009 - 7.3.2.23.9

Background:

The Purpose: section of Test 135.1 - 2009 - 7.3.2.23.9 contains the sentence: "If Protocol_Revision is not present, or has a value less than 4, then this test shall not be performed."

Question:

Should Test Plan section 3.19.5 Test Conditionality: change from blank, to "If Protocol_Revision is not present, or has a value less than 4, then this test shall not be performed." ? BTW, Test Plan section 3.19.5 refers to BTL – 7.3.2.23.9, but the test is not in that file. 135.1 - 2009 - 7.3.2.23.9 seems to be what is intended.

Response:

No, this checklist item will never be checked if the IUT has Protocol_Revision < 4. The Test Plan section reference will be corrected to refer to 135.1 - 2009 - 7.3.2.23.9
