

Clarification Request

References: 135.1 - 2009 - 7.3.2.23.1 Effective_Period Test

Background / Proposed Solution:

There is a BTL Specified and a 135.1 - 2009 - 7.3.2.23.1 **Effective_Period Test**

Purpose: To verify that Effective_Period controls the range of dates during which the Schedule object is active.

Test Concept: Two Date values are chosen by the TD based on the criteria in Table 7-1 such that one is outside of the Effective_Period and the other corresponds to a known scheduled state inside the Effective_Period. The IUT's local date and time are changed between these dates and the Present_Value property is monitored to verify that write operations occur only within the Effective_Period.

Our Effective_Period date range is read only in a schedule object. The standard does not require it to be writable and our schedule is implemented to be always effective.

Question:

Should the test or test plan be qualified with conditionality in this regard?

Response:

No, the checklist and test plan already contain conditionality for this point.
