

Clarification Request

References: 135.1-2009 tests 9.22.2.3 and 9.23.2.6

Date of BTL-WG Response: _Sep 20, 2012

Background:

As per test plan 9.0 for test “135.1-2009 - 9.22.2.3 - Writing with a Property Value Having the Wrong Datatype” for protocol revision ‘6’ Error Code “Invalid Datatype” is only expected.

While for test “135.1-2009i-10 - 9.23.2.6 - Writing with a Property Value Having the Wrong Datatype” several Reject errors are also accepted. Same Errors should be updated for test 9.22.2.3 also.

Question:

Can same error checking code be implemented for both WP as for WPM services?

Response:

For this pair of tests, 9.22.2.3 accepts the same set of error responses as 9.23.2.6.
